## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection as necessitated by applicant's amendment.

### ***Specification***

2. The amendment filed 8/1/08 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a *biasing device* mounted in the hollow grip and the magazine latch held in a *neutral* position or the *accommodating position* of the magazine. The specification as originally filed discloses a spring mounted in the hollow grip; however the disclosure is specific as to the spring and does not encompass the broad language of *biasing device*, which could encompass something other than a spring. Similarly with the magazine latch held in the neutral position, the specification as originally filed discloses the magazine latch held in a middle position, however this specific language does not encompass the broad language of neutral position in that applicant has not previously disclosed that the middle position is a *neutral* position and also it is not inherently so. The specification does not disclose an *accommodating position* or exactly what is considered an accommodating position and it is not clear what position is considered such.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 2-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, at the time the application was filed, does not describe the *biasing device* mounted in the hollow grip or the magazine latch held in a *neutral* middle position. The specification as originally filed discloses a spring mounted in the hollow grip; however the disclosure is specific as to the spring and does not encompass the broad language of *biasing device*, which could encompass something other than a spring. Similarly with the magazine latch held in the neutral position, the specification as originally filed discloses the magazine latch held in a middle position, however this specific language does not encompass the broad language of neutral position in that applicant has not previously disclosed that the middle position is a *neutral* position and also it is not inherently so.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 8 and 9 recites the limitation "one or the other of the two grooves". There is insufficient antecedent basis for this limitation in the claim in that two grooves have not been previously recited but applicant has merely recited *a respective groove* which is not plural.

7. Claim 10 recites the magazine being insertable into the grip along the axis to an *accommodating position*. It is not clear what applicant means by the term *accommodating position* or what position constitutes an *accommodating position*.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
